Title: *GeoGebra* and cross-curricular cooperation
(Геогeбра и међупредметна сарадња)

Abstract:

The practice and the numerous research shown that the cross-curricular cooperation contributes to the students' better achievement of the learning outcomes. Usually, cross-curricular cooperation is being realized through problem-based and project-based learning. Dynamic software *GeoGebra* provides numerous opportunities in the application of these approaches. The participants will have the opportunity to see the solving of the problem tasks, which require mathematics and geography knowledge, in *GeoGebra* environment.
